Description

Als Tool: Execute on the console for two consecutive times, and the console flashes back.

1. Create two folders test1 and test2, and put the same DOC documents in them respectively, such as test.doc
2. Select the document location of test1 and execute the console. The console log is like test1.png
3. On the basis of not turning off the console, select the test2 file position and execute it again,

Expected results: normal execution of the program.
Actual result: there is a problem with the console, such as test2.png and 5S rear console flash back
